

CALL FOR PAPERS

Future Safety: has the past become irrelevant?

The current level of aviation safety has a long legacy, but does this mean we are heading in the right direction? Do investigations and recommendations add up? Within the 2019 ISASI conference, papers will be considered that address this theme and all aspects of investigation, safety training and education, human factors, and technical developments. Presentation topics that support the theme include, but are not limited to:

- Recent accidents/incidents investigations of particular interest.
- Novel investigation techniques for aircraft, helicopter and drone accidents.
- Human factors investigation methods, techniques and future developments.
- Data investigation methods, techniques and future developments.
- Airport investigation methods, techniques and future developments
- Investigator selection, training and future needs.
- Lessons learned and potential future developments in recommendations.

Apart from the main program, the 2019 seminar will include several parallel *special topic* sessions. These special topics will include Air Traffic Control and Airport investigation, Space Investigation, RPAS and Maintenance investigation. Papers for these special topics are actively sought.

The paper selection will follow a double-blind review process, meaning that both the authors and reviewers will remain anonymous during the paper selection process. For those who would like to submit a paper and present at the seminar, please download and use the ISASI 2019 abstract template, which can be found on ISASI 2019 website (www.ISASI2019.org) and send it to:

Abstract@isasi2019.org

Important dates:

March 18th 2019 – Last date for receipt of abstracts.

May 8th 2019 – Presenters informed of acceptance and provided with additional instructions.

May 22nd 2019 – Draft program for the 2019 Seminar Technical Program will be published.

July 9th 2019 – Last date for receipt of completed paper and PowerPoint presentation.

Accepted papers are expected to be presented at the conference by one of the paper authors. Presentation slots of 30 minutes will be allotted where presentations should not exceed 25 minutes, ensuring at least 5 minutes for questions. If you have questions related to the paper topics or any other inquiries please contact the ISASI 2019 program chair:
